DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The term "more closely" in claim 4 line 4 is a relative term which renders the claim indefinite. The term "more closely" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Would a difference of 0.0001 in meet the "more closely" limitation?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Koike et al. (5,813,521).

Koike et al. teaches a keyboard switch comprising:

a keytop 20 (figs. 1-4);

a base plate (comprising of 24 and 25);

Art Unit: 2832

film sheet 23;
elastic member 26;
a plurality of link members 31 and 32;
each member has a first end portion and a second end portion facing each other (31-3 and 31-6 in fig. 4A);
the link members 31 and 32 not crossing each other; and
the first end portion 31-3 slidably supported by a slide supporting portions 21-3 and 21-5 of the keytop 20 and the second end 31-6 rotatably supported by rotating supporting portion 25-5 (fig. 2C) formed on the base plate.

Allowable Subject Matter

6. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 2 recites detailed structures for the link members. Such structure, in combination with the base claim, are neither disclosed nor suggested by the prior art of record. Claims 3-7 depend on claim 2.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to the attached PTO-892.
